Subject Index of Volume 47

Agitated reactors
mass transfer characteristics of gases in *n*-decane at elevated pressures and temperatures in agitated reactors, 33
Alga
influence of cadmium and zinc on the cell size distribution of the alga *Chlorella vulgaris*, B23

Boundary integral element
boundary integral element method for linear diffusion–reaction problems with discontinuous boundary conditions, 169
Bubble column
gas hold-up in a bidimensional two-phase spouted bed, 135

Cadmium
influence of cadmium and zinc on the cell size distribution of the alga *Chlorella vulgaris*, B23
Calcined limestone
reaction of HCl gas with calcined commercial limestone particles: the effect of particle size, 11
thermogravimetric study of the reaction of hydrogen chloride gas with calcined limestone: determination of kinetic parameters, 1
Catalyst decay
analysis of combined temperature and space time trajectories to maintain constant the exit conversion of fixed bed reactors with catalyst decay, 105
Chlorella vulgaris
influence of cadmium and zinc on the cell size distribution of the alga *Chlorella vulgaris*, B23
Circulation time
circulation time model for fed-batch reactors, 149
Complex distillation sequences
arrangement of complex distillation sequences, 119

Diffusion
boundary integral element method for linear diffusion–reaction problems with discontinuous boundary conditions, 169

Ethanol
ethanol production in an entrapped yeast cell column, B1
Ethene
effect of periodic dosing of ethene in the Fischer–Tropsch synthesis, 83
Europium
model analysis of a membrane-partitioned electrode reactor, 25

Fed-batch reactors
circulation time model for fed-batch reactors, 149
Fermentation
direct dynamic k_La measurement in viscous fermentation broths — the residual gas hold-up problem, B35
Fischer–Tropsch synthesis
effect of periodic dosing of ethene in the Fischer–Tropsch synthesis, 83
Fixed bed reactors
analysis of combined temperature and space time trajectories to maintain constant the exit conversion of fixed bed reactors with catalyst decay, 105
fixed-bed reactor design for self-inhibitory substrates, B11
Fluidized beds
axial mixing of fine particles in fluidized beds, 47

Gas hold-up
direct dynamic k_La measurement in viscous fermentation broths — the residual gas hold-up problem, 535
gas hold-up in a bidimensional two-phase spouted bed, 135
Gas sparging
effect of gas sparging on the rate of mass transfer at a single sphere, 187
Grid-generated turbulence
micromixing in grid-generated turbulence: theoretical analysis and experimental study, 155

Heat transfer
effect of gas sparging on the rate of mass transfer at a single sphere, 187
heat transfer and hydrodynamic investigations conducted in a bubble column with powders of small particles and a viscous liquid, 91
Hydrocarbons
semi-theoretical viscosity model for non-polar liquids, 163
Hydrodynamic investigations
heat transfer and hydrodynamic investigations conducted in a bubble column with powders of small particles and a viscous liquid, 91
Hydrogen chloride gas
reaction of HCl gas with calcined commercial limestone particles: the effect of particle size, 11
thermogravimetric study of the reaction of hydrogen chloride gas with calcined limestone: determination of kinetic parameters, 1

Immobilized yeast
ethanol production in an entrapped yeast cell column, B1
Ion exchange membranes
ionic transport through an ion exchange membrane, 75
Ionic transport
ionic transport through an ion exchange membrane, 75
Isotropic turbulence theory
axial mixing of fine particles in fluidized beds, 47

Elsevier Sequoia/Printed in The Netherlands

Kinetics
semi-theoretical viscosity model for non-polar liquids, 163

Laminar flow devices
on residence time and trajectory calculations in motionless mixers, 141
Liquid-phase mass transfer resistance
influence of viscosity on the liquid–phase mass transfer resistance in packed columns, 51

Mass transfer
effect of gas sparging on the rage of mass transfer at a single sphere, 187
mass transfer characteristics of gases in *n*-decane at elevated pressures and temperatures in agitated reactors, 33
Membrane-partitioned electrode
a model analysis of a membrane-partitioned electrode reactor, 25
Micromixing
micromixing in grid-generated turbulence: theoretical analysis and experimental study, 155
motionless mixers
on residence time and trajectory calculations in motionless mixers, 141

n-decane
mass transfer characteristics of gases in *n*-decane at elevated pressures and temperatures in agitated reactors, 33
Non-polar liquids
a semi-theoretical viscosity model for non-polar liquids, 163

Polycarbonate–polyarylate blends
sorption and transport of sulfur dioxide in polycarbonate–polyarylate blends, 63
Powders
heat transfer and hydrodynamic investigations conducted in a bubble column with powders of small particles and a viscous liquid, 91
Pressure measurements
on the determination of second virial coefficients from pressure measurements only, 113

Residence time
on residence time and trajectory calculations in motionless mixers, 141

Second virial coefficients
on the determination of second virial coefficients from pressure measurements only, 113
Self-inhibitory substrates
fixed-bed reactor design for self-inhibitory substrates, B11
Sorption
sorption and transport of sulfur dioxide in polycarbonate–polyarylate blends, 63
Space time trajectories
analysis of combined temperature and space time trajectories to maintain constant the exit conversion of fixed bed reactors with catalyst decay, 105
Spouted bed
gas hold-up in a bidimensional two-phase spouted bed, 135
Sulphur dioxide
sorption and transport of sulfur dioxide in polycarbonate–polyarylate blends, 63

Trajectory
on residence time and trajectory calculations in motionless mixers, 141
Turbulence
micromixing in grid-generated turbulence: theoretical analysis and experimental study, 155

Variable-density systems
non-isothermal reactor design for variable-density systems, 17
Viscosity
heat transfer and hydrodynamic investigations conducted in a bubble column with powders of small particles and a viscous liquid, 91
semi-theoretical viscosity model for non-polar liquids, 163
the influence of viscosity on the liquid-phase mass transfer resistance in packed columns, 51

Zinc
influence of cadmium and zinc on the cell size distribution of the alga *Chlorella vulgaris*, B23
